In the words of one elegiac tribute, “Great men have two lives: one which occurs while they work on this earth; a second which begins at the day of their death and continues as long as their ideas and conceptions remain powerful.”

These words befit the great Benjamin Franklin, whose inventions, innovations, ideas, writings, and public works continue to shape our thinking and renew the Republic he helped to create and the institutions he founded, including the University of Pennsylvania.

Nowhere does Franklin feel more contemporary, more revolutionary, and more alive than at the University of Pennsylvania. His startling vision of a secular, nonsectarian Academy that would foster an “Inclination join’d with an Ability to serve Mankind, one’s Country, Friends and Family” has never ceased to challenge Penn to redefine the scope and mission of the modern American university.

When pursued vigorously and simultaneously, the two missions – developing the inclination to do good and the ability to do well – merge to help form a more perfect university that educates more capable citizens for our democracy.

Penn has embodied and advanced Franklin’s revolutionary vision for 281 years. Throughout its history, Penn has extended the frontiers of higher learning and research to produce graduates and scholars whose work has enriched the nation and all of humanity.

The modern liberal arts curriculum as we know it can trace its roots to Franklin’s innovation to have Penn students study international commerce and foreign languages.

The first medical and business schools in the United States were launched here.

And the first general-purpose electronic, digital computer – ENIAC – was invented right here at the University of Pennsylvania.

The entire Penn family, including our 330,000 alumni world-wide, shares our commitment to grow inclusion by building a diverse community for living, learning, and service; to spark innovation by inspiring inventive thinking across disciplines; and to accelerate impact by sharing the benefits of new knowledge and discoveries through active engagement with our local and global communities.

Today, Penn proudly graduates a class of women and men who have shown the intelligence, drive, integrity, and character to become engaged citizens who will serve humanity with distinction. Our Penn graduates are poised to take their place as productive democratic citizens and as just and humane stewards of our world.

In these challenging and perilous times, a world in need of young women and men who are willing to shoulder the moral responsibilities of leadership can look to Penn.

Franklin wrote: “We may make these times better if we bestir ourselves. The noblest question in the world is ‘What good may I do in it?’”

The answer to this question will be furnished by Franklin’s newest heirs, the graduates of 2021.

Opening Proclamation
David L. Cohen, Chair of the Board of Trustees

The National Anthem
Henry Jacob Platt, C’21

Oh, say, can you see, by the dawn’s early light,
What so proudly we hailed at the twilight’s last gleaming?
Whose broad stripes and bright stars, thro’ the perilous fight
O’er the ramparts we watched, were so gallantly streaming.
And the rockets’ red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say, does that star-spangled banner yet wave
O’er the land of the free and the home of the brave?

The Red and Blue
By William J. Goeckel, Class of 1896, and Harry E. Westervelt, Class of 1898
Come all ye loyal classmates now, in hall and campus through,
Lift up your hearts and voices for the royal Red and Blue.
Fair Harvard has her crimson, old Yale her colors too,
But for dear Pennsylvania, we wear the Red and Blue.
(Chorus)
Hurrah! Hurrah! Pennsylvania!
Hurrah for the Red and the Blue;
Hurrah! Hurrah! Hurrah! Hurrah!
Hurrah for the Red and the Blue.

Recessional
The practice of sporting signs on caps and gowns as a form of public proclamation at Commencement dates to the early 1760s and recalls an even more ancient tradition, originating in the practice of medieval universities. Penn’s archives contain several 18th century broadsides, printed in Latin, which were distributed to Commencement guests along with the regular programs. The broadsides contain a series of propositions classified under various academic headings. Presumably, the graduating students were willing to defend these theses against any assertions to the contrary. On the eve of the Revolution, however, statements such as “the rights of the people are as divine as the rights of their rulers” must have met with widespread sympathy.

Academic Ceremony and Regalia

Commencement exercises at American universities and colleges traditionally are composed of three essential elements: the Academic Procession, the conferring of degrees, and the Commencement address. This practice has been codified since 1895, when a national conference on academic costume and ceremony was proposed and a plan known initially as the “Intercollegiate System” was formally adopted. The Trustees of the University of Pennsylvania incorporated this code into the Statutes of the University in November 1896. Now under the aegis of the American Council on Education, the “Academic Costume Code and Academic Ceremony Guide” was revised in 1932 and 1960.* Throughout the 20th century, and today, Commencement at Penn has, with minor modifications, followed the dictates of the code and its revisions.

By 1896, however, Penn had been granting degrees for nearly 140 years. Like other American colonial colleges, Penn borrowed its 18th century commencement rituals directly from the English universities. In England, the history of academic dress reaches back to the early days of the oldest schools. As early as the second half of the 14th century, the statutes of certain colleges prohibited “excess in apparel” and required the wearing of a long gown. It is still an open question as to whether academic dress finds its sources chiefly in ecclesiastical or in civilian dress. It is often suggested that gowns and hoods were the simplest, most effective method of staying warm in the unheated, stone buildings that housed medieval scholars. In any case, academic regalia had evolved to contemporary familiarity by the time Benjamin Franklin was awarded an honorary Doctor of Laws by the University of St. Andrews in 1759.

Traditions and Current Practice at Penn

In April 1887, on the recommendation of a committee of the faculty, the Trustees adopted the “Pennsylvania’ System of Academic Costume.” The colors and trimmings of hoods and caps were regularized according to faculty and degree. Beginning with the Commencement of 1887, the “Pennsylvania’ System” was published in each year’s program and adherence to its rules was expected of trustees, faculty, and students alike. Beginning in 1896, the “‘Pennsylvania’ System” was superseded by the “Intercollegiate System,” which has continued in effect to the present time.

The gowns used in American academic ceremonies vary according to the highest degree awarded to the wearer. The gown for the bachelor’s degree has pointed sleeves; it is designed to be worn closed. The gown for the master’s degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut and the front has an arc cut away. The master’s gown may be worn open or closed. The doctoral gown is a more elaborate costume faced down the front with black velvet and across the sleeves with three bars of the same; these facings and crossbars may be of velvet of the color distinctive to the field of study to which the degree pertains. The doctoral gown has bell-shaped sleeves and may be worn open or closed. Some institutions have authorized doctoral gowns in colors other than the customary black; holders of the University of Pennsylvania doctorate may wear red and blue gowns.

The hoods are lined in silk with the official color or colors of the college or university which granted the highest degree held by the wearer; more than one color is shown by division of the field color in a variety of ways, such as by chevron or chevrons. The binding or edging of the hood is in velvet, with widths of two inches, three inches, and five inches for the bachelor’s, master’s, and doctoral degrees, respectively. The color of the border indicates the field of study to which the degree pertains. University of Pennsylvania graduates wear a hood lined in red with a blue chevron. The mortarboard cap is standard, though soft square-topped caps are permissible. Recipients of doctorates may wear a gold tassel fastened to the middle point of the top of the cap; all others wear black.
Degrees shall be conferred today according to the following order:
Arts & Letters, white
Science, golden yellow
Business Administration, mustard
Nursing, apricot
Medicine, green
Law, purple
Fine Arts (including Design), brown
Dental Medicine, lilac
Veterinary Medicine, gray
Education, light blue
Social Work, citron
Philosophy, dark blue

University Mace
The Secretary of the University carries the University mace, the symbol of authority of the University, at the head of the Academic Procession. It was a gift of the family of William Murray Gordon, M.D. 1910. It is adorned with the seal and arms of the University, the Penn and Franklin coats-of-arms, a depiction of the Rittenhouse Orrery, and a thistle symbolizing the early ties of the University with Scotland.

President’s Badge of Office
The President wears as a badge of office a silver medallion of which one face is engraved, like the mace, with the University seal. The obverse of the President’s medal bears the “orrery seal,” designed in 1782 by Francis Hopkinson, A.B. 1757, a signer of the Declaration of Independence. The medal, suspended on a chain composed of silver links, was given by the late Trustee Thomas Sovereign Gates, Jr., A.B. 1928, LL.D. 1956, on the occasion of Sheldon Hackney’s inauguration as President in October 1981.

UNIVERSITY SEAL AND SYMBOLS

Seal of the Corporation
The Trustees of the University have an official seal that is, in effect, the signature of the Corporation. It had its origin at a meeting of the Board of Trustees in 1755 with Benjamin Franklin as Chairman. Though the seal underwent changes over the years, the most recent design, approved in 1932 and adopted in 1933, returned it to virtually its original form.

The seal is composed of seven books stacked on a slanted desktop, with the books bearing the following titles, representing the curricula of the day: Theolog, Astronom, Philosoph, Mathemat, Logica, Rhetorica, Grammatica. On the periphery of the stack of books appears the University motto, Leges Sine Moribus Vanae, and the whole is encircled with the inscription Universitatis Pennsylvaniensis.

Motto:
Leges Sine Moribus Vanae
The motto of the University, Leges Sine Moribus Vanae, means “Laws without morals are useless.” It comes from the longer quotation from Horace, “Quid leges sine moribus vanae proficiunt?” the sense of which is “Of what avail are empty laws without (good) morals?”

Penn Coat-of-Arms
The Penn coat-of-arms was derived by combining the coat of arms of Benjamin Franklin and that of William Penn’s family. The dolphin on the red chief was part of Franklin’s coat-of-arms and the three silver plates on a blue chevron were a part of Penn’s. The two were combined on a white shield along with two open volumes representing the University’s educational purpose.

School Colors
Eighteenth century American academic institutions did not have colors. The earliest known representation of the combined Penn colors, red and blue, is on the incised lid of the 1871 College Hall cornerstone.

One legend traces their origins to an early track meet at Saratoga, New York, between Penn, Harvard, and Yale. When asked by the officials what colors would be representing the Penn team, the Pennsylvania captain reportedly replied, “We’re going to be wearing the colors of the teams we beat,” i.e., Harvard Crimson and Yale Blue. We shall assume that Penn was victorious and thus remained loyal to the Red and Blue.

School of Arts and Sciences
(1755)
The School of Arts and Sciences (SAS) is the direct descendant of the College of Philadelphia, where Benjamin Franklin established the first modern arts and sciences curriculum in the English colonies. Undergraduate programs for men date to the chartering of the College in 1755; the College of Liberal Arts for Women was founded in 1933. The Graduate School was established in 1882 with the appointment of a Faculty of Philosophy. The College of Liberal and Professional Studies (lifelong learning) traces its roots to 1892. The School of Arts and Sciences was born in 1974 with the merger of the College of Arts and Sciences, the College for Women, the Graduate School, and four social science departments from Wharton. Today SAS is the largest of the University’s 12 schools, providing a liberal arts education for all Penn undergraduates and supporting graduate studies, basic research, and continuing education across the full range of the humanities, natural sciences, and social sciences. The School has 27 departments with 522 standing faculty, 28 research centers, four interschool institutes, and 10,000 students.

Perelman School of Medicine
(1765)
Established in 1765 as the nation’s first medical school, what is now known as the Raymond and Ruth Perelman School of Medicine at the University of Pennsylvania continues a rich tradition of providing the nation’s best medical training and education, with service to its community as a cornerstone. Today, the school honors its long standing commitment to advancing knowledge and improving health close to home and across the world through research, patient care, and the education of trainees in an inclusive culture that embraces diversity. More than 775 students are pursuing medical degrees in the Perelman School, and more than 750 are studying toward doctorates in biomedical sciences, with over 215 more enrolled in joint MD/PhD programs. Across the school’s affiliated hospitals, 1,475 residents and fellows are completing their medical training. Over the past decade, the Perelman School of Medicine has consistently been ranked among the top recipients of research funding from the National Institutes of Health.

Law School (1790)
Penn’s engagement in legal education began in 1790 with a series of lectures to President Washington and his cabinet by James Wilson, the University’s first law professor, a signer of the Declaration of Independence and one of the original justices of the Supreme Court of the United States. A formal program of instruction in law was established in 1850 under George Sharswood, and innovative legal education has been part of the Penn fabric since that time. The University of Pennsylvania Carey Law School provides a cross-disciplinary, globally focused legal education taught by preeminent scholars, approximately 70 percent of whom hold advanced degrees in fields in addition to law. Students augment the teaching provided by Law faculty with classes taken – and certificates of study and joint degrees earned – in sister schools and departments throughout the University. In the 2020-2021 academic year, the Law School has over 950 students and 91 full-time faculty. The Law School awards five degrees: Juris Doctor; Master of Laws for internationally trained lawyers; Master of Comparative Laws; Doctor of Juridical Science; and Master in Law for non-lawyers.

School of Engineering and Applied Science (1852)
The School of Engineering and Applied Science is one of the oldest in the United States, tracing its beginnings to the establishment of the School of Mines, Arts and Manufactures in 1852. The first graduate of the School received a Bachelor of Science degree in 1854. For the past 150 years, engineering has been a vibrant and collaborative community of innovation at Penn. Our world-acclaimed faculty, state-of-the-art research laboratories and highly interdisciplinary curricula offer an experience for our students that is unparalleled. From the time ENIAC, the world’s first computer, was developed and introduced on campus in 1946, Penn Engineering has continued a tradition of leadership and cutting-edge research. Innovation and technology drive our every program and Penn Engineers play a critical role in posing and answering the questions that will improve lives and transform our world. The Penn Engineering community consists of 133 standing faculty, approximately 2,000 undergraduate students, 2,100 graduate students and 14 research centers and institutes.

Stuart Weitzman School of Design (1869)
Although the School of Design dates its founding from 1890, architecture courses were first offered at the University of Pennsylvania in 1869, making Penn’s architecture program the second oldest in the United States. In 1921, the Department of Architecture joined with the Department of Music and Fine Arts to create an independent undergraduate School of Fine Arts modeled on the French École des Beaux Arts. In 1958, the School was renamed the Graduate School of Fine Arts, reflecting the shift to graduate degree offerings in architecture, city and regional planning, landscape architecture, and fine arts. In the 1980s, a program in historic preservation was added. To more accurately capture the School’s sphere of influence, it was renamed the School of Design in 2003. In recognition of both his lifetime philanthropic support of Penn and his active engagement with its
The University of Pennsylvania Graduate School of Education (Penn GSE) is one of the nation's premier schools of education, consistently producing top-ranked researchers and educational leaders. The University of Pennsylvania created its first professorship in education in 1894 and established the full-fledged School of Education in 1914. The School’s first graduating class in 1915 comprised three women and three men, who received the School’s first Bachelor of Science in Education degrees. In 1961, the School was restructured and renamed the Graduate School of Education. Penn GSE launched an Administrative Leadership Program in 1971 to prepare school administrators for creative and dynamic leadership. This was the first in a long line of successful leadership programs. Today, Penn GSE offers 37 programs leading to the PhD, EdD, MPhil Ed, and MS Ed degrees in more than 30 fields of education. Reflecting a deep commitment to urban education, Penn GSE’s students and researchers are involved in schools across every catchment area of the School District of Philadelphia, including robust partnerships with two West Philadelphia schools. Penn GSE is also home to the Milken-Penn GSE Education Business Plan Competition, intended to spark innovations that improve education by bringing together entrepreneurs and funders for sustained collaboration. No other education school enjoys a university environment as supportive of practical knowledge building as Penn GSE.

School of Veterinary Medicine (1884)
Ranked among the top 10 veterinary schools worldwide, the University of Pennsylvania School of Veterinary Medicine (Penn Vet) is a global leader in veterinary education, research, and clinical care. Founded in 1884, Penn Vet is the first veterinary school developed in association with a medical school. The School is a proud member of the One Health initiative, linking human, animal, and environmental health. Penn Vet serves a diverse population of animals at its two campuses, which include extensive diagnostic and research laboratories. Ryan Hospital in Philadelphia provides care for dogs, cats, and other domestic/companion animals, handling nearly 35,300 patient visits a year. New Bolton Center, Penn Vet’s large-animal hospital on nearly 700 acres in rural Kennett Square, PA, cares for horses and livestock/farm animals. The hospital handles nearly 5,300 patient visits a year, while the Field Service treats more than 38,000 patients at local farms. In addition, New Bolton Center’s campus includes a swine center, working dairy, and poultry unit that provide valuable research for the agriculture industry.

School of Dental Medicine (1878)
Established in 1878 as the Dental Department of the University of Pennsylvania, the School of Dental Medicine is among the oldest university-affiliated dental institutions in the country with a history deeply rooted in forging precedents in dental education, research, and patient care. In 1897, Thomas W. Evans, a Philadelphia native and clinician who spent most of his life in France as the dentist to European nobility, left his estate to create a dental school that was “second to none.” Evans’ bequest would become one with the University, creating the Thomas W. Evans Museum and Dental Institute, which opened in 1915. Today, the Evans Building remains the site of much of the School’s clinical instruction. The dental campus also includes the Robert Schattner Center and the Leon Levy Center for Oral Health Research, home to the basic sciences and extensive research activities. Penn Dental Medicine is a major provider of care in West Philadelphia and through outreach programs, students log nearly 24,500 hours each year serving approximately 20,000 residents in the surrounding Philadelphia neighborhoods. Penn Dental Medicine offers the degrees of Doctor of Dental Medicine, Master of Science in Oral Biology, Doctor of Science in Dentistry and trains postdoctoral students in endodontics, oral medicine, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, periodontics/orthodontics, periodontal/prosthodontics. In the 2020-2021 academic year, Penn Dental Medicine has 633 DMD students, 129 Post-Doctoral Students, 12 of which are enrolled in the Doctor of Science in Dentistry with Certificate and 24 of which are in the Master of Science in Oral Biology Program with certificate, 5 are in the Doctor of Science in Dentistry stand-alone program and 17 postdoctoral researchers. Penn Dental Medicine has 430 faculty members, including 97 standing faculty.

Wharton School (1881)
Founded in 1881 as the world’s first collegiate business school, the Wharton School of the University of Pennsylvania is shaping the future of business by incubating ideas, driving insights, and creating leaders who change the world. With a faculty of more than 235 renowned professors, Wharton has 5,000+ undergraduate, MBA, executive MBA and doctoral students. Each year 18,000 professionals from around the world advance their careers through Wharton Executive Education’s individual, company-customized, and online programs. More than 100,000 Wharton alumni form a powerful global network of leaders who transform business every day.

School of Veterinary Medicine (1884)
Ranked among the top 10 veterinary schools worldwide, the University of Pennsylvania School of Veterinary Medicine (Penn Vet) is a global leader in veterinary education, research, and clinical care. Graduate School of Education (1914)
The University of Pennsylvania Graduate School of Education (Penn GSE) is one of the nation’s premier schools of education, consistently producing top-ranked researchers and educational leaders. The University of Pennsylvania created its first professorship in education in 1894 and established the full-fledged School of Education in 1914. The School’s first graduating class in 1915 comprised three women and three men, who received the School’s first Bachelor of Science in Education degrees. No other education school enjoys a university environment as supportive of practical knowledge building as Penn GSE.

School of Nursing (1935)
Nursing Education began in 1886 when the Hospital of the University of Pennsylvania started a nurse training program. In 1935, the Trustees of the University of
Pennsylvania established a nursing degree program within the School of Education, and in 1950 the School of Nursing was established. The Master of Science in Nursing program was instituted in 1961, the Doctor of Nursing Science program in 1978, the Doctor of Philosophy program in 1984, and the Doctor of Nursing Practice program in 2016. These innovations and a curriculum which progressively reflects changing health care delivery patterns have advanced the School into the first rank of American schools of nursing. The School has two departments, Biobehavioral Health Sciences and Family and Community Health. It is widely recognized for its leadership in nursing research in the areas of health outcomes and policy research, nursing history, biobehavioral health sciences, global women’s health, health equity, aging, and transitions in health. It also has a global reputation for innovations in nurse-managed clinical practice and is a World Health Organization Collaborating Center for Nursing and Midwifery Leadership. The School of Nursing has 54 standing faculty and 1,428 students.

School of Social Policy & Practice (1948)
The School of Social Policy & Practice began in 1908 as a private school that opened its doors to five students in the field of child welfare. The School affiliated itself with the University in 1935 and became a formal school in 1948. In 2005, it changed its name from the School of Social Work to the School of Social Policy & Practice. The School offers the Master of Social Work, Master of Science in Nonprofit Leadership, Master of Science in Social Policy, Doctor of Philosophy in Social Welfare, and Doctor of Social Work degrees. The School is devoted to advancing human welfare, promoting social justice, and developing effective societal responses to global human need. Building on the School’s more than century-long commitment to social work and social change, the School educates clinicians, policymakers, scholars, researchers, and leaders who work to advance the human welfare of local, national, and global communities. The School houses a number of research centers and programs, including: Center for Guaranteed Income Research; Center for High Impact Philanthropy; Center for Mental Health and Aging; Center for Social Impact Strategy; Field Center for Children’s Policy Practice and Research; Ortner Center on Violence & Abuse; Actionable Intelligence for Social Policy; Annual Homelessness Assessment Report; Critical Policy Studies; Health Ecologies Lab; Penn Restorative Entrepreneurship Program; Program for Religion and Social Policy Research; SexGen Policy Lab; Social Impact of the Arts Project; Social Justice and Arts Integration Initiative; Goldring Reentry Initiative; Ann Nolan Reese Penn Aging Certificate; Child Well-Being & Child Welfare Specialization; Criminal Justice Specialization; LGBTQ Certificate; Social Work in Health Care Specialization; Cohen Veterans Network MSW Scholars Program; and Data Analytics for Social Policy Certificate. The School has 26 standing faculty, two full-time lecturers, and 530 students.

Annenberg School for Communication (1959)
Founded through the generosity and vision of diplomat and philanthropist Walter Annenberg, the Annenberg School for Communication (ASC) at the University of Pennsylvania is devoted to furthering our understanding of the role of communication in public life through research, education, and service. At the School's founding, Ambassador Annenberg identified its unique mission: “Every human advancement or reversal can be understood through communication. The right to free communication carries with it responsibility to respect the dignity of others — and this must be recognized as irreversible. Educating students to effectively communicate this message and to be of service to all people is the enduring mission of this school.” With strengths in health communication, political communication, culture and communication, media institutions, digital media, visual communication, and global communication, ASC is one of the top communication schools in the nation. The Annenberg School has 22 standing faculty members, 30 additional research and teaching faculty and associates, 70 graduate students, and nearly 200 undergraduate Communication majors. The School offers the degree of Doctor of Philosophy as well as a Bachelor of Arts major run through the College of Arts and Sciences. The School is home to the Addiction, Health, and Adolescence Lab; Annenberg Public Policy Center; Center for Advanced Research in Global Communication; Center for Media at Risk; Center on Digital Culture and Society; Communication Neuroscience Lab; Health Communication and Equity Lab; Institute for Public Service; Institute for the Study of Citizens and Politics; Media, Inequality and Change Center; Network Dynamics Group, and the Peace and Conflict Neuroscience Lab, among many other projects pursuing innovative communication research and teaching.

Writing holds the steadfast place of a devotional practice in your life, born of your own creative desires and the conviction that you are obligated to speak out with purpose. A decorated poet, author, memoirist, and leader, you have explored race and gender, memory and motherhood, base inhumanities and the foundations of love.

The author or co-author of 14 books, you have twice been a Pulitzer Prize finalist, including for your 2015 memoir, The Light of the World, a profound meditation on the unexpected death of your beloved husband. This generosity deeply touched the hearts and minds of readers, many on their own journeys of bereavement. Your poems, short stories, and critical writings have been widely published in journals and periodicals ranging from The Paris Review to The Village Voice.

As the president of The Andrew W. Mellon Foundation, the nation’s largest supporter of arts and culture, as well as humanities in higher education, you strengthen vital arts communities through expanded accessibility, diversity, and cross-disciplinary collaboration. Earlier, among your responsibilities as the Ford Foundation’s Director of Creativity and Free Expression, you co-designed the Art for Justice Fund, employing art and advocacy to combat the crisis of mass incarceration.

Born in Harlem, you grew up in Washington, DC. Following Yale University undergraduate studies and master’s work at Boston University, Penn proudly claimed you as an alumna when you received your Ph.D. in 1992. During that time, while studying and teaching, you also published your critically acclaimed first work, The Venus Hottentot.

Your scholarship, teaching, and mentorship has inspired a generation of students. You were the W. Tsun Tam Mellon Professor in the Humanities at Columbia University. At Yale University for 15 years, you were named the inaugural Frederick Isman Professor of Poetry and helped rebuild its African American Studies department. You also taught at Smith College, where you created its Poetry Center.

President-Elect Obama asked that you compose and perform a poem for his 2009 inauguration. Praise Song for the Day captured celebration and solemnity as a nation swore in its first Black President. Around the world, millions listened and watched and came to know your work.

Among your many accolades are the Jackson Poetry Prize, the George Kent Award, three Pushcart Prizes for Poetry, and membership in the American Academy of Arts and Sciences. Chancellor Emeritus of the Academy of American Poets, you are also a founding member of Cave Canem, dedicated to promoting African American poets and poetry.

In recognition of your unique creative voice illuminating truths and for encouraging, nurturing, and sustaining the creative voices of countless others, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Elizabeth Alexander, the degree of Doctor of Humane Letters, honoris causa.

Frances H. Arnold

Life essential enzymes are complex protein molecules that catalyze chemical reactions. These reactions can be harnessed to create endless products from medicines and vaccines, to gene delivery systems, and even to biofuels. For scientists, however, producing enzymes in the laboratory was a difficult, frustrating, and wasteful process.

You were the first to ask whether scientists could effectively partner with evolution for better results. The initial response from your peers was, at best, underwhelming. Always willing to go against the flow, you persisted, and in years of tireless research you pioneered methods of commercial “directed evolution,” to efficiently and sustainably create a range of novel, beneficial catalysts that spur life-saving developments. Today, an acclaimed leader in your field, you have provided us with a fundamental understanding of how proteins evolve and function in nature.

Your groundbreaking work was recognized with the 2018 Nobel Prize in Chemistry. You are only the fifth woman and the first American woman to be so named, a strong inspiration for the young scientists of all genders who follow.

A native of Pittsburgh and eager to direct your own future, you sought personal independence at an early age. You earned a B.S. in Mechanical and Aerospace Engineering from Princeton University, rare for a woman at that time. You later earned a Ph.D. in Chemical Engineering from the University of California, Berkeley, staying for postdoctoral work in biophysical chemistry. Today, you are the Linus Pauling Professor of Chemical Engineering, Bioengineering and Biochemistry at the California Institute of Technology and the co-inventor on more than 60 U.S. patents and the co-founder of the biotechnology companies Gevo, Provivi, and Aralez Bio.

In January of this year, President Biden named you to Co-Chair the President’s Council of Advisors on Science and Technology. You also serve on the Advisory Panel of the David and Lucile Packard Foundation Fellowships in Science and Engineering and the Board of Trustees of the Gordon Research Conferences.

In recognition of your singular achievements, you have received the Charles Stark Draper Prize of the U.S. National Academy of Engineering and the Millennium Technology Prize from The Technology Academy, Finland. In 2013, you were awarded the National...

A common thread runs throughout your extraordinary life and career: your determination to serve the many communities you call home. The impact of your work on behalf of Philadelphia and its institutions is immeasurable. Never one to seek the limelight, you believe real change relies on creative teamwork, careful planning, and optimizing opportunity.

Born in New York to parents deeply engaged with both their civic and religious communities, you completed your undergraduate studies at Swarthmore College and became a proud Penn alumnus with your Juris Doctor in 1981 at Penn Law. You put your law degree to excellent use as a partner and subsequently Chair of Ballard Spahr Andrews & Ingersoll, LLP, one of the country’s 100 largest law firms.

As Chief of Staff to the Honorable Edward G. Rendell, Mayor of Philadelphia, you played a critical role at a profound turning point in the history of the city. From budgetary and financial issues; to economic development and collective bargaining negotiations; to strengthening institutions of higher education, health care, arts, and culture, the extent of your commitment to Philadelphia cannot be overstated, then or since.

In 2002, you joined Comcast, now Comcast NBC Universal, one of the largest telecommunications and media organizations worldwide. For many years you were Senior Executive Vice President and Comcast’s first Chief Diversity Officer leading a broad portfolio. You also spearheaded programs to conquer economic barriers to vital computer and Internet access, reach young people through valuable skills training programs, and develop assistive technology. Today, you are Senior Advisor at Comcast and serve as senior counselor to the CEO.

Joining the Penn Trustees in 2001, you provided expert leadership as Chair to the newly organized Board and Executive Committee of Penn Medicine, working to assure its position as a world-class provider of medical care and innovation. In 2009, you were elected Chair of the Penn Trustees and its Executive Committee. During your years as Chair, Penn set the bar for its peers, exponentially growing educational access and support, powering interdisciplinary discovery and innovation, attaining new heights in clinical care, and engaging at home and abroad like never before. Two exceptionally successful fundraising campaigns during your tenure further strengthen Penn’s essential work. You find joy in engaging personally with students and faculty whenever possible. They are invariably awed by your generous mentorship.

The exceptional range of your civic engagement includes the Board of the Greater Philadelphia Chamber of Commerce, Chair of the Philadelphia Theatre Company, and the United States Semiquincentennial Commission. You also serve on the national boards of City Year, the National Urban League, and chair the Corporate Advisory Board of UnidosUS. In your spare time, you are chairing the FIFA World Cup Philadelphia Bid Committee.

Your honors are legion, from the Greater Philadelphia Chamber of Commerce’s William Penn Award and the William Way Community Center Amicus in Res Award to recognition from the Anti-Defamation League and the American Red Cross.

Joy Harjo
When named United States Poet Laureate in 2019 (the first Native American to receive that honor), you memorably offered: “You never know where you are going to land.” By your example, we see the courage in first making the leap. You have crafted a unique career as an artist, performer, writer, and as an acclaimed figure in American poetry. Your work bears witness to the present and the past, interweaving feminism, social justice, political resistance, and personal and ancestral memory, all underscored with First Nations storytelling.

Born in Tulsa, Oklahoma, you found drawing and then poetry as early ways to talk to the world—and to make it through difficult early years. You studied at the Institute of American Indian Arts and received a B.A. at the University of New Mexico, Albuquerque. You published your first volume of poetry, The Last Song, while you were still a student. You then earned your M.F.A. at the University of Iowa.

Your nine award-winning poetry collections include An American Sunrise, Conflict Resolution for Holy Beings, She Had Some Horses, and two children’s books. You have also co-edited two anthologies of contemporary Native women’s writing. Your 2012 memoir Crazy Brave—whose title translates your own name Harjo—won the PEN USA Literary Award for Creative Non-Fiction and the American Book Award.

A lifelong love of music opened new creative doors for you. You perform...
international music and poetry albums include this year’s I Pray For My Enemies and the award-winning Winding Through the Milky Way. You have also widely performed your one-woman show, Wings of Night Sky, Wings of Morning Light.

The recipient of the John Simon Guggenheim Memorial Foundation and Rasmuson United States Artist Fellowships, among others, your many honors include the National Writers Circle of the Americas Lifetime Achievement Award and the American Indian Distinguished Achievement in the Arts Award. Your work has garnered the Jackson Prize and the Willaim Carlos Williams Award from the Poetry Society of America, the Poetry Foundation’s Ruth Lilly Prize, and the Wallace Stevens Award from the Academy of American Poets.

An Academy of American Poets Chancellor and founding board member of the Native Arts and Cultures Foundation, you also direct For Girls Becoming, an arts mentorship for young Mvskoke women. Your Library of Congress Living Nations, Living Words digital archive project has launched, giving public voice to a host of contemporary Native Nations poets.

In recognition of your courage in sharing your truths and those of many others, and in most creatively furthering understanding of our shared cultural history, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Joy Harjo, the degree of Doctor of Humane Letters, honoris causa.

David Miliband

“The first refugees I met were my parents.” As the eldest son of immigrants fleeing the horrors of World War II, this simple truth has underscored your life’s work born of action, passion, and empathy. A noted public policy analyst, since 2013 you have been the President and CEO of the International Rescue Committee (IRC), one of the world’s largest humanitarian aid organizations.

Today, IRC is active in over 40 countries, facing humanitarian crises head-on and assisting those impacted so that they can survive, recover, and gain control of their futures. Each year, the IRC provides millions of children with urgently needed schooling and their families with food, water, and medicine. IRC has fought Ebola, gender-based violence, and abuses of human rights, and champions access to employment and pay equity. In the United States, the IRC has harnessed the volunteer energy of thousands to assist children and adults seeking asylum. In 2018, more than 5,300 refugees were resettled with IRC assistance.

Providing immediate assistance is critical, without question, but is only part of IRC’s global strategy to support the development of effective policy. Warning against an “arrogance of power,” you have put wealthy countries on notice that facing these crises is no less than a test of our humanity. You urge public and private sector collaboration worldwide to identify and surmount the many underlying causes of global instability, and to assure better outcomes.

A London native, you completed your undergraduate studies at Oxford University and received your master’s degree from the Massachusetts Institute of Technology as a Kennedy Scholar.

Working first at the Institute for Public Policy Research, at age 29 you became an adviser to Prime Minister Tony Blair, launching a distinguished political career in the United Kingdom. A member of Parliament for 13 years, as Secretary of State for the Environment you pioneered the world’s first legally binding emissions reduction requirements. From 2007 to 2010, you were the youngest Secretary of State for Foreign and Commonwealth Affairs in three decades, driving advancements in human rights. Then, in just a few years, you would join IRC, where your expertise and leadership have spearheaded positive change.

In recognition of your efforts, in 2016 you were named one of the World’s Greatest Leaders by Fortune Magazine and, in 2018, inducted into the American Academy of Arts and Sciences. You also serve as a member of the Trilateral Commission, founded and chaired by David Rockefeller, and have been a member of the Global Ocean Commission.

An eloquent advocate addressing the urgent issues of the poor and displaced, you are much in demand as a public speaker, teacher, and guest journalist. You are also the author of Rescue: Refugees and the Political Crisis of Our Time.

For your steadfast vision for human rights and a compassionate global society, and for the hope and assistance that you have given to those most vulnerable, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, David Miliband, the degree of Doctor of Laws, honoris causa.

Lauren Powell Jobs

You speak of the unimaginable reach of human capability—that potential lying within each of us—and the imperative to use our talents and energy for transformative, lasting change. There, in your “gardens of promise,” opportunity can thrive despite obstacles of economic and life circumstance, and potential can indeed flourish. The cycle of new possibilities serves as the engine for change and progress. With you, we celebrate the conviction that even one person can make that change.

As founder and president of Emerson Collective, which works in pursuit of a more equal and just world, your leadership engages a combination of wide-ranging tools—from impact investing to philanthropy to advocacy—to lift up entrepreneurs, leaders, innovators, and creators to advance progress in education, immigration, climate, and cancer research and treatment. You have made it your mission to harness these powerful resources to maximize impact, and you have inspired many to heed your call to action.

It is with the greatest pride that Penn claims you as a most valued member of our global alumni family.
You earned your B.A. in political science from the College of Arts and Sciences and a B.S. in economics from The Wharton School. An East Coast native, you would work at Goldman Sachs before going on to earn your MBA from the Stanford Graduate School of Business and make your home in California. Your connection to Penn continues through your engagement with Penn’s Netter Center for Community Partnerships National Advisory Board.

You have long recognized that access to education is a critical pathway to opportunity. Over two decades ago, you founded College Track, a college completion program where you remain board chair today, developing innovative programs to combat the alarming achievement gap facing students of color. You are also cofounder and board chair of The XQ Institute, the nation’s leading organization dedicated to rethinking the high school experience. In keeping with your belief in supporting journalism as a vital civic institution, you are the co-owner of The Atlantic and co-owner of Anonymous Content and Concordia Studio.

Further exemplars of your commitment to broad engagement include your service on the Stanford University Board of Trustees and the boards of Chicago CRED, Conservation International, The Council on Foreign Relations, Elemental Excelerator, where you are board chair, and Nia Tero. In addition, you are a member of the National Academy of Arts and Sciences, and a recipient of Stanford Graduate School of Business’ Ernest C. Arbuckle Award for managerial excellence and addressing the changing needs of society.

For your steadfast vision that the potential for positive change lies within us and for your passionate determination to cultivate new opportunities for those most in need, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Laurene Powell Jobs, the degree of Doctor of Humane Letters, honoris causa.

John Williams
To describe your life’s work is to summon music to one’s mind and to invoke some of the most moving and memorable scores of our time. Called a living history of the American movie soundtrack, you have helped transform myriad films into cultural touchstones worldwide. With an amazing career spanning seven decades, you rank among America’s preeminent and beloved composers for television, film, and the concert stage.

Consider your wide-ranging credits: you worked as a studio pianist on the films West Side Story and To Kill a Mockingbird, composed the scores for over 200 television films, and music for Gilligan’s Island and Lost in Space. Your first Academy Award came in 1972 for the score of the classic Fiddler on the Roof. Your terrifying accompaniment to a Great White shark lurked in Jaws, one of many acclaimed films with director Steven Spielberg, alongside Schindler’s List, Jurassic Park, ET, Close Encounters of the Third Kind, Indiana Jones, and Saving Private Ryan. You also composed the scores for nine Star Wars films and the first three Harry Potter films. Your unmistakable symphonic style was especially embraced in an emerging era of synthesized technology.

The music director for the iconic Boston Pops Orchestra for many years, you also have composed symphonies and concertos premiered by leading orchestras. Commissions for public events have included several Olympic games, the 1986 Statue of Liberty rededication, and President Obama’s first inaugural ceremony.

A New York native and Los Angeles transplant, as the son of a professional musician you took to music early. Your first instrument was piano, then trumpet, trombone, and clarinet. Then, as a teen, you began writing and scoring. You also studied at the University of California, Los Angeles and the Juilliard School and performed in jazz clubs.

Among your many accolades, you have five Academy Awards and 52 nominations, the most of any living person. You have earned seven British Academy Awards, four Golden Globes, five Emmys, 25 Grammys, and numerous gold and platinum records. Other outstanding awards include the National Medal of Arts, the Kennedy Center Honors, the Royal Philharmonic Society Gold Medal, the Princess of Asturias Award for the Arts, the Olympic Order, and the American Academy of Recording Arts and Sciences Trustees Awards. You are the first composer to receive the American Film Institute’s Life Achievement Award.

In 2004, the Library of Congress named the Star Wars movie soundtrack to the extraordinary honor of perpetual preservation in the National Recording Registry. As live performance returns in the wake of the pandemic, your presence is greatly anticipated through thriving artistic relationships with many of the world’s great orchestras, and continuing roles as Boston Pops Laureate Conductor and Artist-in-Residence at Tanglewood.

For your unparalleled artistic mastery and boundless enthusiasm for sharing your passion for music with audiences worldwide, and for your immeasurable contributions to the art and enjoyment of film, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, John Williams, the degree of Doctor of Music, honoris causa.

Janet L. Yellen
On January 26, 2021, you were sworn in as the 78th Secretary of the Treasury of the United States, the first woman appointed to this role. This pathbreaking achievement captured the attention of the American public. As rapper/singer Dessa put it in the track “Who’s Yellen Now?” which is almost certainly the first ode to a policy economist: “Watch your step / There’s broken glass / Janet broke another ceiling / You can bet your brass.”

Your unique career spanning nearly 50 years has encompassed many such firsts. As a mark of your perseverance and the deep respect that you have earned, you are the first person in history to lead the federal government’s three most powerful economic bodies: the Treasury, the
Federal Reserve, and the White House Council of Economic Advisers.

Speaking to the Treasury’s 84,000 employees following your swearing-in, you acknowledged urgent challenges facing our country—the pandemic and economic decline, climate change, and systemic racism—and expressed characteristic confidence in your Department’s ability to address them. Your Keynesian values and unparalleled global influence in representing our country’s interests through the years are without peer.

Born in Brooklyn, you graduated from Brown University and earned your Ph.D. at Yale University, the sole woman among two dozen economists graduating. You joined the faculty of the University of California, Berkeley, in 1980, where you were the Eugene E. and Catherine M. Trefethen Professor of Business Administration and Professor of Economics; today, you are Professor Emerita. You began your career on the faculty of Harvard University, lectured at the London School of Economics, and served as a Distinguished Fellow in Residence at the Brookings Institution.

Your scholarship broadly covers labor and macroeconomics, particularly the causes, mechanisms, and implications of unemployment. The author of numerous articles, you are also the co-author of *The Fabulous Decade: Macroeconomic Lessons from the 1990s*. You twice served on the Federal Reserve Board of Governors and chaired President Clinton’s Council of Economic Advisers. As president of the Federal Reserve Bank of San Francisco, you were among the first to foresee the looming housing financial crisis and 2008 recession and were instrumental in seeing our country through the disaster. Vice-chair of the Federal Reserve from 2010 to 2014, you were nominated by President Obama to be its first woman chair.

You are a Distinguished Fellow of the American Economic Association, and served as its Vice President and President. Your many memberships include the American Academy of Arts and Sciences, the Council on Foreign Relations, and founding membership on the Climate Leadership Council. Yale awarded you its Wilbur Cross Medal and you received the Truman Medal for Economic Policy from the Truman Library Institute. In honor of your dedicated public service, the Federal Reserve Board created its Janet L. Yellen Award for Excellence in Community Development.

For your incomparable leadership through teaching, scholarship, and public service on behalf of your country and its people, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Janet L. Yellen, the degree of Doctor of Laws, *honoris causa*.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.

Candidates for the degrees of Master of Arts, Master of Science or Doctor of Philosophy can be found under the Graduate Faculties listing.
As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

Candidates for the degrees of Master of Arts, Master of Science or Doctor of Philosophy can be found under the Graduate Faculties listing
As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.
